Valid for all papers in categories 1–3. Printing of inner cut lines for each image. Invoicing price per square meter. Images to be cut by the customer.

Information about file formats, margins, cutting

Please submit files in TIFF format with no layers, no alpha channels, and with profile Adobe RGB (1998), or in JPG format.

Selection of the printing field for sheet goods must be at least 6 mm (short side) and 17 mm (long side) shorter than the respective side lengths. For later mounting with passepartout frames, an all-round paper margin of 15 mm minimum is recommended.

Wide roll formats: 17"/43.2 cm, 24"/61.0 cm, 36"/91.4 cm and 44"/111.8 cm. A margin of 5 mm both right and left is necessary, i.e. the printing area is 1 cm shorter than the roll width.

In the case of panorama formats with proportions greater than 1:2, with a longer side in excess of 108 cm (e. g. 40 x 120 cm (1:3), 40 x 160 cm (1:4) etc.), the necessary paper wastage will be calculated additionally. In this case, we are happy to submit a separate estimate of costs.

**Four-sided cutting of roll paper to dimensions stipulated by the customer:**  
 16 EUR per image up to 100 cm x 200 cm (ca. 1.5 mm tolerance).
